

Custom Designs are Our Specialty

There is a place for art glass in any décor. It can be an enhancement or a center of focus. If you are considering a major investment in art glass, the glass and design must be planned carefully to outlast any other changes you might make over the years.

We will ask for your input in the form of photos, fabric designs, tiles or just ideas from your imagination to determine the color and style of your window. There are many pattern books available in our studio to help you with this.

Once we have a good idea of what you have pictured for your art glass we will produce scale drawings based on your dimensions. When the drawings are complete, we will ask you to visit our studio to discuss the drawings and choose the glass to be used.

Central Kentucky's Source for All of Your Stained Glass Needs

Stained glass gives an elegant, timeless appeal to any surrounding.

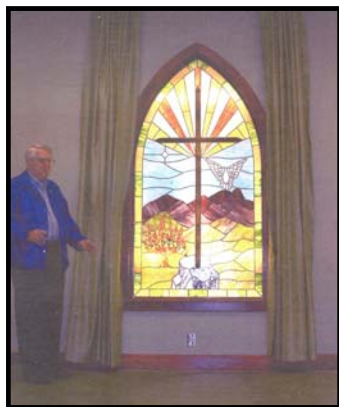

Design and Consultation Costs:

Designing for stained or leaded glass is very different from any other type of art work.

Because we use glass, we must design to allow for cutting of the glass, and also for structural integrity. While it is possible to adapt designs from other mediums (photos, fabric, paintings, etc.) it can be quite challenging and often time consuming.

Because of this, we must charge for our design time.

In most cases, design time is absorbed into the overall cost of the window. However, if we are creating an original design based on a specific idea of yours; or creating a design from something that you have supplied to us such as a photograph, fabric, tile, family crest, logo, etc., there may be an additional charge for design time.

Large or small, nothing matches the beauty and impact of stained glass.

Estimating the Cost of Custom Stained Glass Designs

Pricing custom stained glass designs can seem complicated. Hopefully this formula will help you arrive at an estimate and give you an idea of the “Ball Park” figure prior to a contracted price.

Our prices are determined by a base square foot price, combined with the cost of the number of pieces used in the design. The average design will have 15-20 pieces per square foot. More is charged for bevels, jewels, wood frames and other specialty treatments. The pieces are priced between \$2.00-\$4.00 each depending on the type of glass and the intricacy of the cuts.

Formula for estimate:

Height in inches ____ times

width in inches ____ equals ____.

Divided by 144 equals ____ square feet.

Your square feet ____ multiplied by \$110.00 equals \$____ (A) Base price.

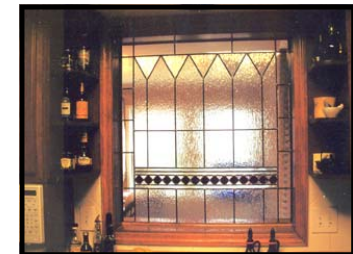

Your square feet ____ multiplied

by 20 ____ equals average number of pieces.

Your average number of pieces multiplied by \$3.00 equals \$____ (B) cost of pieces. If your piece has more pieces than average, then the price will be higher.

Add the base price (A) to the cost of the pieces (B) and you have an estimate for your window. \$_____

Design: Your project will progress through several stages beginning with the design stage. We require a \$100.00 deposit before any drawings or site visits take place. This is a non-refundable deposit, however it will be applied to the total so it serves as a deposit. Once your design is approved and the glass chosen for your order, we ask for one half of the projected total before we begin cutting glass. The balance is due and payable upon completion.

Homeowners added a distinctive flair to this kitchen with a custom window.

How Long Does it Take? It depends upon our workload when we take your order, how quickly we can work through the design process, how quickly you can respond when it's time for design and glass consultations, and the complexity of your design. However, we cannot tell you exactly when a project will be completed. Time constraints can interfere with the quality of our work. If you have a deadline (a special event or holiday) it is best to get started in plenty of time and let us know when your deadline is.
